Dera Ghazi Khan, Pakistan

SKILLS

Languages:

- Typescript, Javascript, SQL, php

Frontend:

- React.js, Next.js, Tailwind CSS

Backend:

- Node.js, Express.js, Laravel

Database:

- Postgresql, Mysql, MongoDB

Tools:

- Git, GitHub, Postman

Deployment:

- Vercel, Render

PROGRAMMING CONCEPT

- Data Structures & Algorithms (DSA)
- Object-Oriented Programming (OOP)

EDUCATION

BS Information Technology

Ghazi University, Dera Ghazi Khan

2023 – 2027

ABOUT ME

Passionate MERN Stack Developer with strong foundations in Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), and modern full-stack web development. Skilled in building responsive and scalable web applications using React.js, Node.js, Express.js, PostgreSQL, and TypeScript. Experienced in REST API development, frontend optimization, and writing clean, maintainable code. Continuously learning modern technologies and focused on solving real-world problems through efficient software solutions.

I have a strong ability to leverage AI tools to improve productivity, generate ideas, write efficient code, debug issues, and stay updated with the latest technologies. I believe in smart work with AI to build better, faster, and scalable solutions.

PROJECTS

E-COMMERCE STORE (CARTIFY)

A full-stack e-commerce platform with user authentication, product catalog, search, filtering, shopping cart, wishlist, and secure checkout. Users can manage profiles, addresses, and orders. Admin panel for managing products, categories, orders, and users. Integrated payment gateway and email notifications.

NOTES APP

A secure notes application where users can register/login, create, edit, delete, and search notes. Notes can be categorized and tagged for easy management. Features include dark mode, rich text support, and cloud sync.

EXPENSE TRACKER

An expense management application with user authentication. Users can add, edit, delete, and categorize expenses, set budgets, and view analytics with charts. Features include filters, monthly/yearly summaries, and export options.

TODO APP

A task management application with authentication. Users can create, update, delete, and organize tasks with status (To Do, In Progress, Done), set due dates, and prioritize tasks. Includes search, filtering, and local/cloud persistence.

HOTEL MANAGEMENT SYSTEM (USING LARAVEL)

A complete hotel management system built with Laravel and MySQL. Features user authentication with role-based access (Admin, Staff, Manager, Receptionist). Modules include room management, booking system, customer management, check-in/check-out, billing, and reports. Designed a clean dashboard for admins and staff.

WEBSITE DEPLOYMENT

Deployed full-stack projects using modern deployment platforms like Vercel (Frontend) and Render (Backend) for seamless CI/CD and performance optimization.
